

INFORMATION TECHNOLOGY/CYBER SECURITY SOLUTIONS

'The modern thief can steal more with a computer than a gun'- National Research Council, "Computers at Risk", 1991.

Introduction

BACKGROUND CHECK INTERNATIONAL

The impact and influence of the internet over the past few years has been immense. The widespread availability of computers and internet connections provides unprecedented opportunities in every field-entertainment, medicine, business, education.

There are two sides to a coin. The internet, along with its advantages has also exposed us to security risks. Cybercrime is one of the major disadvantages of the internet.

What is Cybercrime?

Definitions of cybercrime include:

- the use of any computer network for crime. (British Police)
- any criminal offence committed against or with the help of a computer network. (Council of Europe).

Some categories cybercrime are:

- Website Cloning
 - Financial Fraud
 - Identity Theft
 - Credit Card Theft
 - Cybertheft
 - Cyberharassment
 - Fraudulent Electronic Mails.
 - Cyberlaundering
 - Virus / Worms / Trojans
- among other criminal activities

Effects of Cybercrime:

BACKGROUND CHECK INTERNATIONAL

There are many damaging consequences of cybercrime

- Financial loss
- Loss of reputation
- Reduced productivity

BCI's IT / Cyber Security Solutions:

- Background Check International (BCI) is the pioneer of the Background Screening industry in Nigeria, and we offer claims verification, investigative due diligence, risk management and IT security / cyber crime solutions.
- We are members of the Association of Certified Fraud Examiners (ACFE) USA, Nigeria Institute for Industrial Security (NIIS), and also the Association of Professional Background Screeners (NAPBS) USA- of which we are its first African member, and only African member of its International Committee.
- We pioneered the African Alliance / Networking group among African background screening, investigations & risk solution firms.

Goals of BCI's IT / Cybercrime Investigation Unit

- To help our clients reduce the vulnerability of their Information and Communication Technology (ICT) systems and networks.
- To help our clients develop and nurture a culture of cyber security.
- To work collaboratively with public, private and international entities to secure cyberspace.
- To help understand the current trends in IT/cybercrime, and develop effective solutions.
